

Customer Support Chatbot

1. Selected SDG and Reason for Selection

Selected SDG:

SDG 9 – Industry, Innovation and Infrastructure

What the SDG Focuses On:

SDG 9 aims to promote innovation, technological advancement, and digital infrastructure to improve services and support sustainable development.

Why This Issue is Important:

Many businesses struggle to provide quick and efficient customer support. Customers often experience delays when seeking information about products, shipping, returns, and services. Using chatbot technology helps businesses provide instant support, improve customer satisfaction, and enhance operational efficiency.

2. Problem Statement

Customer service teams often receive a large number of repetitive queries related to store hours, shipping policies, returns, exchanges, and support information.

Where does the problem exist?

The problem exists in online stores, e-commerce platforms, and businesses that handle customer inquiries.

Who is affected?

- Customers waiting for responses.
- Customer support teams managing repetitive requests.
- Businesses trying to provide timely assistance.

Why is it serious?

Slow response times can reduce customer satisfaction and increase support costs.

What could happen if it is not solved?

- Poor customer experience.
- Increased workload for support staff.
- Loss of customers and reduced business efficiency

3. Proposed Solution

Project Name:

Customer Support Chatbot

What the Project Is:

A chatbot developed using Botpress that provides automated responses to common customer questions.

How the System Works:

Users interact with the chatbot through a chat interface. The chatbot identifies the user's query and provides relevant information instantly.

How It Helps Solve the Problem:

- Provides 24/7 customer support.
- Reduces response time.
- Handles frequently asked questions automatically.
- Reduces workload on support teams.

Target Users:

- Online shoppers.
 - Business customers.
 - Customer support departments.
-

4. Project Features

1. User-Friendly Interface

Provides an easy-to-use chat interface where users can ask questions and receive instant responses.

2. Store Hours Information

Displays business operating hours whenever requested by users.

3. Shipping Policy Assistance

Provides information regarding delivery times, shipping methods, and tracking details.

4. Returns and Exchanges Support

Guides users through return and exchange policies and procedures.

5. Help and Support Section

Provides contact details and assistance options for customer inquiries.

6. Automated FAQ Responses

Answers frequently asked questions without requiring human intervention.

5. Technology Stack

Chatbot Platform:

- Botpress

Development Tools:

- Botpress Studio
- GitHub

Documentation:

- Microsoft Word
-

8. Future Scope

- Integration with live order tracking systems.
 - Multi-language support.
 - Voice-enabled chatbot interactions.
 - AI-powered personalized recommendations.
 - WhatsApp and Telegram integration.
 - Advanced customer analytics dashboard.
 - Integration with CRM systems for better customer management.
-

Conclusion

The Customer Support Chatbot is an innovative solution that improves customer service through automation. By providing instant responses and 24/7 assistance, it enhances customer satisfaction while reducing the workload on support teams. The project supports SDG 9 by promoting innovation and digital transformation in customer service operations.
